

4250M

250mm Multipoint Chart Recorder

The model 4250M is a multi-channel, 250mm, high performance processing recorder with concurrent text annotation. The recorder features a color display and 'secret-'til-lit' keyboard to simplify configuration. The 4250M has the capacity to accept up to 96 input channels, which together with other options available, combine to form one of the most flexible standalone or networked recorders on the market.
